

NEUROBLATE[®] REIMBURSEMENT SUPPORT PROGRAM

The program simplifies access to reimbursement information and support including:

- > Benefit verification + patient eligibility
- > Prior authorization process
- > NeuroBlate coding inquiries
- > Pre-determination of payer coverage
- > Claim appeals as needed

We are committed to supporting our customers' needs by providing reimbursement support to help navigate the complex healthcare environment. To engage with the Monteris reimbursement support team, please call, fax, or send an e-mail to us.

Monteris Medical offers the services of insurance authorization, coding and coverage information as part of our NeuroBlate Reimbursement Support Program.

Disclosures

Monteris provides technology for neurosurgeons, which allows them to ablate (destroy with heat), brain structures such as brain tumors, radiation necrosis, and epileptic foci. Monteris technology includes the NeuroBlate System, AtamA, and MiniBolt devices, which may be used together to apply the focused laser energy with little or no effect on surrounding healthy tissue. The NeuroBlate System provides clinicians a tool that offers near real-time control and MRI visualization of the therapy during laser ablation treatment.

All brain surgeries carry risk. Possible adverse events include, but are not limited to, hematoma, embolic events, edema, bleeding, cerebral spinal fluid (CSF) leakage, infection, unintended major tissue damage and permanent neurological deficits. Prior to using these devices, please review the Instructions for Use for a complete listing of indications, contraindications, warnings, precautions and potential adverse events. For full prescribing information, please visit monteris.com
